

SX-680

**Far greater performance
in much less space**

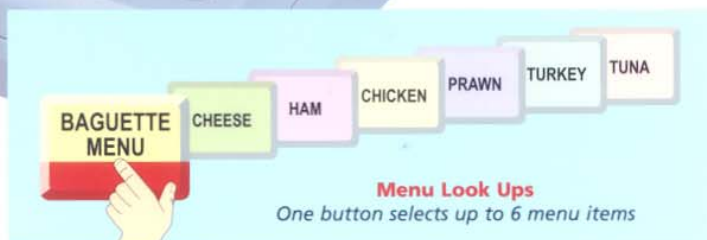

**With its innovative
Menu Look Up feature
SX-680 has 200+
pre-set menu items
in a small footprint,
low profile
hospitality ECR**

Shown without
cash drawer

SX-680 can operate

- Completely stand-alone
- With inter-register communication for consolidated reporting
- Linked to PC for simple sales reporting and/or full inventory control

**SMART ECR SYSTEMS
THAT DO MORE - COST LESS**

Serving the hospitality industry since 1957

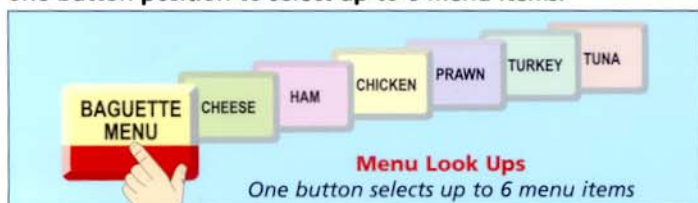

SX-680 is loaded with innovative features for today's hospitality environments. Even inter-register communication is a standard feature

Inter-Register Communication (IRC)

Up to 8 Models SX-680 can be linked by 'click and connect' telephone style plugs for consolidated management reporting. Servers and tables can float across the IRC network.

Menu Look Ups (MLU)

Menu Look Up Buttons enable this small footprint ECR to have 200+ pre-set menu items on the keyboard. MLUs simplify and speed customer service because you need only one button position to select up to 6 menu items.

Design your own Keyboard

Your Dealer can supply professionally printed and laminated spill-resistant keyboard layouts. If you prefer to change layouts yourself, speak to your Dealer about the *David* Programming Utility. *David* prints your keyboard layouts in colour and maintains staff names, products and prices. *David* is fun and simple to use with many short cuts and on-screen help.

Silent, Speedy Printing with Graphic Logo

The printer is noiseless and very fast. Your company logo or special design can be stored in the SX-680's memory and printed on each receipt or guest check. There is no ribbon to replace or fade, so receipts of the same exceptional clarity are produced every time.

Powerful Reporting for Management

A wide choice of Management Reports is available from each SX-680 and, in the case of linked systems, from the master terminal. Alternatively, clear, concise Management Reports in graph and/or table format are available via Geller software.

Low Cost of Ownership

SX-680 is reliable by design so service costs are kept to a minimum. There are no ribbons to change. Its 'Drop and Load' 58 mm printer makes changing paper rolls easy and helps to prevent paper jams.

Protecting your Investment

SX-680's flash memory technology means that, as your business grows or your requirements change, your Dealer can upgrade your SX-680s to the latest specification via a plug-in program loader.

Authorised Sales and Support Dealer

Distribution throughout the United Kingdom and Republic of Ireland by the appointed Dealers of Geller Business Machines, Greenford, Middlesex, England.

BACK OFFICE PC AND GELLER SOFTWARE

A range of Geller software is available for use with the SX-680 -

David Utility is a keyboard design and ECR maintenance program. It designs and prints your keyboard layouts in full colour. It changes and backs up staff and product names and prices. *David* operates in-house or via modem for remote sites.

David Sales Manager is a low-cost yet sophisticated reporting program that produces clear, concise management reports in graph and/or table format. *David Sales Manager* works in-house or multi site with no limit on the number of ECRs or sites.

SAM Version 6 is a single/multi site sales and management reporting program which can export data to other software packages, such as Excel where users have specific information requirements. *SAM* can be upgraded to *SuperStock*.

SuperStock Version 6 is sophisticated inventory control software, single or multi site, with full purchase order processing.
